EDUCATION	2021 Ph.D. in Applied Economics, University of Florida 2017 M.S. in Applied Economics, University of Florida 2014 B.S. in Agriculture (Agribusiness and Economics), University of Cape Coast, Ghana	
SKILLS	Methods: A/B Testing, Quasi-Experimental Methods (IV, RDD, DID, SCM, DML, etc.), Bayesian Methods, Deep Learning Software: Python, R, SQL, Spark/PySpark, Stata Frameworks: PyTorch, EconML, Scikit-learn, AutoGluon, CausalML, Statsmodels Cloud & Infrastructure: AWS, GCP, Distributed Computing, Git	
WORK EXPERIENCE	10/2024 – Present: Economist II, Amazon Web Services – Marketing - Science lead for AWS's multi-touch attribution system, owning the solution from problem formulation and model development (Markov chain and regression-based models that are calibrated to experimental evidence) to downstream prioritization and targeting recommendations for AWS's go-to-market initiatives. - Set the causal measurement strategy for AWS Marketing's owned channels, leading cross-team design and implementation of a framework that combines RCTs and quasi-experimental methods, expanding coverage from 4 channels to 15. 10/2023 – 10/2024: Economist II, Amazon.com – Worldwide Stores - Owned end-to-end development of a double machine learning (DML) measurement solution quantifying how negative customer experiences on Amazon.com change customers' shopping behavior; findings informed remediation strategies that protected ~\$85MM in revenue. 08/2022 – 10/2023: Economist I, Amazon.com – Worldwide Stores - Designed and executed causal evaluations of product quality interventions, translating technical findings into actionable recommendations for product, operations, and customer service partners. 09/2021 – 07/2022: Postdoctoral Research Scientist, George Washington University - Designed and analyzed RCTs evaluating group-based interpersonal therapy on mental health and human capital outcomes among at-risk adolescent girls (StrongMinds Uganda; BRAC Uganda ELA program). - Directed third-round data collection for GAGE, a multi-country longitudinal study on gendered adolescent development across low- and middle-income countries. 08/2021 – 10/2021: Consultant, Catholic Relief Services - Provided technical guidance on applied microeconomic methods for evaluating smallholder farmer initiatives in Ethiopia, informing evidence-based strategies to scale the program. 08/2015 – 07/2021: Research Assistant, University of Florida - Applied econometric and machine learning methods to research projects in political economy, education, and health economics.	
SELECTED PUBLICATIONS	Improving Mental Wellness of Adolescent Girls in Low- and Middle-Income Countries: Causal Evidence from Life Skills Programming. <i>Journal of Human Resources</i> , 2023. COVID-19 and the Gendered Impacts on Adolescent Wellbeing. <i>eClinicalMedicine</i> , 2022. Full publication list: Google Scholar	
WORKING PAPERS	Does Prohibition Curb Farmer-Herder Violence or Backfire? Evidence from Grazing Bans in Nigeria. Household Consumption and Labor Responses to Farmer-Herder Conflict: Evidence from Nigeria. Managerial Turnover and Team Performance: Evidence from 33 Years of the English Premier League.
